	QUALITY POLICY	Date of Issue	08.10.2008
		Revision No	02
		Revision Date	21.02.2019
		Page No	1/1

UZMAR Shipyard has adopted the principle of being among the world companies which are leading and reliable in the development of the sector and which produce commercial and military sea vehicles at high quality standards in the world maritime transport sector as management policy.

The performances of our products in all kinds of nature conditions until today is a proof of reliability for our products in the future.

The main elements of this policy are as follows;

- To design, produce and export Tug boats that will meet customer expectations,
- To identify the changing demands in a timely manner based on the needs and expectations of the relevant party (Internal/External Context) and Customer satisfaction,
- To identify our risks and opportunities and take the required actions,
- To plan all necessary actions to achieve our Quality Objectives and achieve these objectives,
- To protect and continue the sense of sharing, solidarity, cooperation awareness and trust among customers, shipyard and employees,
- To join our national identity with our sense of quality in international standards in every project that we produce,
- To exactly identify and meet the requests of employees, subcontractors and partners,
- To support personal development and creativity,
- To reduce costs by increasing quality and efficiency with continuous improvement activities,
- To target technological leadership in ship building and production,
- To support the development of suppliers and subcontractors in order to achieve common objectives together,
- To continuously improve the processes with audits and trainings,
- To protect the environment, to use materials and technologies that do not harm the environment and human health,
- To be in development by attaching importance to the senses of effective communication, participative behavior, constructive criticism and teamwork.
